Hackathon Brief
Horror Movie Rating

Horror Movie Rating

Horror film is the one that seeks fear in the audience for entertainment purpose.

Horror Movie Rating

Rotten Tomatoes is an American review-aggregation website for film and television.

Rotten Tomatoes and the Tomato-meter score are the world's most trusted recommendation resources for quality entertainment. As the leading online aggregator of movie and TV show reviews from critics, we provide fans with a comprehensive guide to what's Fresh and what's Rotten – in theaters and at home.

Horror movies were wildly popular on streaming platforms over the past year, and in 2020 the horror movie captured its biggest box office share in modern history. So, the company wishes to give a specific rating for a horror film. The rating consists of different categories for a horror movie.

Horror Movie Rating (contd.)

As a web search expert and a database developer, perform the following tasks:

a) Scrape data for various horror movies for different categories.

b) Extract the specific information that ranks movies in the range from least horrific to most horrific.

c) Give analytical trends in the movie transformation that helps to create and build a database for category-specific horror movies.

Movie Rating

Task 1: The company needs the horror movie data for the year 2015-16 along with detailed information.

Task 2: Once you search for the horror movie data, convert it in a specific format based on the tool you are using.

HACKATHON

Movie Rating

Task 3: Bring the data in the required format for analysis.

Task 4: Merge the data in one document instead of having it in separate subfolders.

HACKATHON

Movie Rating

Task 5: Once the data is ready in the available tool satisfying all the requirements, check the movie with the highest gross.

HACKATHON

Task 6: From the article 'The Psychology, Geography, and Architecture of Horror: How Places Creep Us Out,' a sense of the place we live and the experiences we have had there is closely related to our identity. Based on this, identify the countries that are ahead in creating such environmental changes that create feelings of disorientation and dread rather than feelings of comfort, predictability, and security.

HACKATHON

Task 7: Some fantastic horror directors thrill and scare people through movies in their own unique and distinctive fashion. Identify most horror directors who have excelled by bringing nightmares to life.
